DESCRIPTION

This course will give you the proper level of knowledge, understanding and confidence to achieve the best possible management of an Agile team. The course focuses on team transformation and performance improvement through a necessary change of mindset. Working in Agile mode can be difficult, but for sure it is an adventure that combines fun, energy and self-realization. After taking this course, everything will make sense and become much easier.

With the 2 days of training, the learner will immerse step by step in the approaches of project management. Special attention is also given to non-technical skills. Thanks to the numerous examples and exercises, available in different formats, the learner can apply the acquired knowledge in a dynamic way.

This course follows a blended approach which includes the following components:

1. a virtual kick-off,
2. followed by an individual e-Learning of 8 hours, with tutoring
3. followed by a 1-day face-to-face or 2 half-days virtual workshop
