FEATURES

This e-Learning is a in-depth course to help you prepare your PMP® certification. It is the perfect addition to the mandatory PMI® Student Material and it is designed to give a better understanding of the business environment, the project framework, processes and people management. This course is not intended to replace the mandatory PMI® Student Material but acts as a valuable supplement.

The guideline of this e-Learning is interactivity: Participants are deeply involved and have to work on many exercises – the best way to experience and acquire the know-how. Numerous tests have been designed to ensure a perfect understanding. For efficient guidance, references are made to the Project Management Body of Knowledge (PMBOK® Guide), so participants know where to find the detailed explanation in the book.

The course is available in English.

Extra service: The learner can choose whether he/she wants to be accompanied by an experienced tutor during the course. More information on the Tutoring can be found in the dedicated fact sheet.
