APPROACH

Agile ways of working have become an integral part of project delivery across industries and are increasingly valued by organizations seeking professionals who can lead and contribute effectively in Agile environments. The **PMI-ACP® certification** demonstrates knowledge and practical understanding of Agile principles, practices, and approaches across multiple frameworks, including **Scrum, Lean, and Kanban**. Unlike certifications focused on a single framework, PMI-ACP® recognizes a broader, more versatile Agile skill set that can be applied across roles, projects, industries, and organizational environments—not only in IT.

Traditional project management often focuses on questions such as *What needs to be delivered? By when? At what cost? By whom?* Agile approaches add another important perspective: *What delivers the greatest value to the customer? How can we respond to change? And how can we continuously improve the way we work?* PMI-ACP® helps professionals develop and demonstrate this broader Agile mindset.

TRAINING ROLL-OUT

Our training is fully aligned with the **PMI-ACP® Exam Content Outline (ECO)** and combines structured exam preparation with practical application. Our experienced and certified instructors bring the content to life through facilitated discussions, interactive activities, real-world examples, and use cases drawn from actual project environments.

Each of the 6 sessions is 3,5 hours long. On the first day of training you will get access to the X-AM tool which is accessible during 12 months, as well as the official PMI material.

After the course you'll get a certificate from STS which you can use when you register for the exam.

The focus is on active learning rather than passive instruction. Participants are encouraged to ask questions, exchange experiences, discuss different approaches, and apply Agile principles to realistic situations. This creates an engaging learning environment while helping participants build the understanding and confidence required for the PMI-ACP® examination—and for applying Agile practices in their own projects.

COMPREHENSIVE EXAM PREPARATION

Our live training is complemented by **X-AM (PMI-ACP®)**, an exam simulation tool featuring more than 700 practice questions. Participants are encouraged to work intensively with the PMI®-specific content and training materials both during and after the workshops, using X-AM to assess their knowledge, identify gaps, and become familiar with the format and demands of the examination.

To maintain momentum and maximize exam readiness, we recommend taking the PMI-ACP® examination within 4–6 weeks of completing the training.

CONTINUED SUPPORT UNTIL CERTIFICATION

The training does not end when the last course day is over. Our instructor remains available to guide, accompany, and coach participants throughout their preparation until they achieve their PMI-ACP® certification.

The training is delivered in **English**, and all course materials are provided in English.

CONTENT AND LEARNING MATERIAL

The content of the course is roughly split as follows:

- Performance-Based Activities: The students will perform hands-on activities based on assigned case studies.
- Sample Questions: The students will work on the sample questions. The structure of the questions is similar to the real PMI-ACP® exam questions.
- Case Studies: Real-life case studies will be covered during the course.
- Supplementary Information: Examples and other supplementary information will be presented to the students.

For this course you will be provided with following material:

- Access to the online tool “X-AM Simulator ACP” to practice test questions.
- Official PMI-ACP Exam material
- Course slides in PDF format.

IN-HOUSE COURSES

The ACP certification preparation course is also available as a company-specific, in-house offering. It can be delivered in the same format as our public course or tailored to meet your organization’s specific needs. Courses are available in English, French, or German. For more information or to discuss a customized solution, please don’t hesitate to contact us.

We will be delighted to send you a specific offer for in-house courses.
